Institutions	<ul style="list-style-type: none"> • Prince of Wales Public and Private Hospitals • St George Private Hospital • Waratah Private Hospital • Surgical and Orthopaedic Research Laboratories at the University of New South Wales 	
Educational goals and characteristics	<p>The aim of this fellowship is to provide postgraduate education in the area of adult orthopaedic foot and ankle surgery. The fellow will gain exposure to a wide spectrum of foot and ankle pathology, including sports medicine, adult reconstructive surgery, trauma and the diabetic foot. The fellow will participate in a weekly outpatient clinic, monthly high-risk diabetic foot clinic, and foot and ankle problem session. The fellow will also be expected to complete a research project under the supervision of Professor W Walsh for presentation at a national meeting or publication in a peer-reviewed journal.</p>	
Requirements/ criteria	<p>All candidates should have completed their orthopaedic training in their country of origin and be eligible for registration with the New South Wales Medical Board.</p> <p>All candidates should be fluent in English, with a pass of at least 7 in all modules of the IELTS English Language Test, or have evidence of secondary schooling in a country where English is the native language.</p> <p>An Occupational Training Visa for Australia is required (arranged after confirmation of appointment).</p>	
How to Apply	<p>Applications with curriculum vitae, three recent referees and a short paragraph on what the fellow hopes to achieve from the fellowship should be sent to Dr David Lunz. Applications are accepted 18 months in advance.</p>
